Industrial quality saw manufacturers for over 85 years

Saw Manufacturers for over 85 years

Atkinson Walker (Saws) Ltd is one of the leading UK manufacturers of circular saw blades. The company was founded during the 1920s by Richard Henry Walker (b 1864) and ownership and control have remained in the Walker family ever since.

Our core business is the production of high quality industrial Tungsten Carbide Tipped circular saw blades (up to 1000mm) for use in wood, metal, aluminium, plastic and timber industries. These blades offer a robust, long-lasting option for discerning customers who want more than just a throw-away, temporary solution to their cutting needs.

We also manufacture many other associated products including circular knives, alloy circular saws, blanks for the diamond industry TCT tipped tines for the turf care industry and blades for use in food processing.

Our in house CAD/CAM design facility enables us to laser cut any configuration of blade and we welcome the opportunity to quote for special blades.

- ✓ Made in Sheffield, England, to the highest specification using the best materials available
- ✓ Competitive prices with generous discounts
- ✓ Expert technical advice and customer service
- ✓ The flexibility to meet individual requirements for, bore size, pinholes, keyways, expansion slots and noise reduction devices
- ✓ Combination of modern production equipment alongside traditional saw making skills
- ✓ Blades for all makes of circular saw machines
- ✓ A full range of saw repair accessories

SHSS-Cut Off Saws

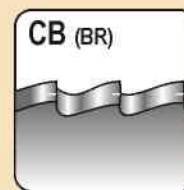

With "AC" toothing Alternate chamfered teeth; the chip is divided into two parts, 1/3rd and 2/3rds of the blade width respectively. Supplied as standard on saw blades with a 3mm and 4mm tooth pitch.

HIGH & LOW
Alternate "V and Flat". The chip is split into three parts, each 1/3rd of the blade width. This improved swarf removal permits the use of higher cutting speeds and feeds on bigger sections and solids. Supplied as standard on saw blades with 5mm and coarser tooth pitches.

"CHIP BREAKER"
Chip breaker toothing is used mainly for cutting tubes. It gives a significant improvement in performance and finish. The increased number of cutting edges engaged in the workpiece considerably reduces the side edge wear. When used on coated saw blades, the number of cuts obtained can be outstanding.

8. **PAYMENT** - Prices quoted are nett. Subject to credit being approved, accounts are due for payment 30 days following the month of despatch, otherwise payment must be received before despatch.

9. **DAMAGE, SHORTAGE & LOSS IN TRANSIT** - Claims for damage, shortage or non-arrival should be made in writing within 14 days of invoice/despatch date.

10. **GUARANTEE/REPLACEMENT** - Every effort is made to ensure sound materials and good workmanship. Goods will normally be rectified or replaced free of charge where the fault is from manufacture, subject to correct use and maintenance of items.

11. **TITLE OF GOODS** - Ownership of the goods shall not pass to the customer until payment for the goods has been received in full.

12. **CANCELLATIONS** - Cancellations are subject to our written confirmation. Any costs incurred have to be borne by the customer.

13. **RETURNS** - Standard stock items are accepted back only after our prior agreement and must be returned in their original condition, carriage paid. Cost of handling, and re-packaging will be passed on to the customer. Returns of special non-standard items are not accepted. Responsibility will not be accepted for any goods returned without a written advice note. Any items modified or branded for a customer cannot be returned.

14. **V.A.T.** - All prices quoted are exclusive of V.A.T. which will be charged at the rate ruling on the day of despatch.
