## A MASTER OF ITS CRAFT. CUTTERS AND SPECIALITY KNIVES FROM MARTOR.

### Quality made in Solingen.

MARTOR KG from Solingen in Germany is the leading international manufacturer of high-quality cutting solutions. Our GS-certified safety knives have been setting benchmarks for decades, and we always aim for the same high standards of quality in developing the range of speciality knives presented in this catalogue.

### Meeting your needs.

Our speciality knives give you highly developed cutting tools for a broad range of trades and applications. For cutting out, cutting off and cutting up as well as for handicrafts, designing, scraping or deburring – you will always get the result you need.

### MARTOR-DNA in every tool.

Our speciality knives, like our safety knives, are a culmination of more than 75 years of experience in knives and blades where no compromise is made on sharpness, reliability and durability, and where only the best plastic and metal materials are used. Furthermore, we know exactly the procedures and principles by which our customers work and are therefore able to provide cutting tools that are, so to speak, tailor-made for the task. This is what makes MARTOR products different.

## FOR SPECIAL TASKS YOU NEED SPECIAL SOLUTIONS.

### More than 40 speciality knives in a multitude of versions.

Manual cutting tasks are required in virtually every work and home situation. To meet your needs, MARTOR has more than 40 different speciality knives, with a large range of blades for different uses as well as practical accessories such as the new belt holster.

### One name for each product family.

To help you find what you need, each product family has its own „first name“. For example, if you come across a product beginning with **ARGENTAX**, you will know that it belongs to the family of standard cutters for universal applications. The **GRAFIX** family covers all scalpel-type cutting tools. MARTOR's professional scrapers begin with the name **SCRAPEX**, and deburrers with **TRIMMEX**.

### Good advice.

Our system of names is just one way of finding what you need. But our mission is to provide you with the MARTOR product that specifically matches your cutting requirements. This is the difference between having a sharp knife and having a knife that is optimal for your cutting needs. Therefore, don't hesitate in contacting us. We can personally advise you on the product for your needs – by telephone, email or we'll arrange to visit you.

ACCESSORIES  
BELT HOLSTERS

Our ARGENTAX family contains all of the cutting tools that you know as cutters: universal knives for the most varied of cutting applications and materials with a handle made of plastic, aluminium or zinc. In addition to this we have a wide range of snap-off and non-segmented blades. You can almost always regulate the cutting depth and the blade retraction manually.

ARGENTAX

ARGENTAX TAP-O-MATIC  
NO. 331.02

**Tough when using. Flexible to handle. With styropor blade.**  
A cutter for high demands? The ARGENTAX TAP-O-MATIC with an 18 mm wide polystyrene blade fulfils this wish. A blade extension of up to 83 mm makes the knife ideal not just for extra deep cutting tasks. The blade lock is also so robust that it can resist cutting pressures of up to 18 kg. And you can also adjust the blade extension to several different levels.

**A robust tool**  
In the ARGENTAX TAP-O-MATIC, the handle and metal rail to guide the blade form a very stable unit. You can really feel it when you take it in your hand. And all the more when you start cutting.

**Large selection**  
Among 15 possible cutting depths, there must be a suitable one for you. The not segmented polystyrene blade, safe from breaking off, is particularly suitable for work with a maximum blade extension.

**Running to a narrow point**  
The handle of the ARGENTAX TAP-O-MATIC tapers off to the front. So you can approach the cut in more narrow areas too.

**The handle? Handy**  
The ARGENTAX TAP-O-MATIC fits exactly into your hand. What's more: the grooves on the back increase the gripping capacity. So there is no risk of your hand slipping while cutting.

**Practical eyelet**  
You don't have to do without the eyelet in the ARGENTAX TAP-O-MATIC. You can just pull a strap through it and attach the cutter wherever you need it.

ARGENTAX CUTTEX 9 MM  
NO. 46102.08

**Classic cutter. With a 9 mm polystyrene blade.**  
Sharp, small, handy - the ARGENTAX CUTTEX 9 MM with a narrow polystyrene blade has all the possible properties you would expect from a cutter. Ideal for easy cutting of cardboard boxes, cardboard, paper and adhesive tape. You can grip the long, rounded off handle comfortably and vary the blade extension as you wish. And what if the bendable blade gets blunt? Change is without problems.

**Small, light, handy**  
The list could be continued endlessly. That's why the long plastic handle is rounded off at many points to make handling it even more pleasant and comfortable for you.

**Easy blade changing**  
Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

**Adjusts well**  
Cardboard box, cardboard, paper? It's all the same. You can flexibly adapt your cutter to the respective conditions with the adjustable blade extension.

**Full cutting depth**  
You are on the safe side with your polystyrene blade even at a maximum blade extension. Because it is extremely bendable and can therefore carry the load of even a high degree of stress.

**Practical pocket clip**  
It's good to have a useful helper such as the ARGENTAX CUTTEX 9 MM at hand, fast. You can attach it to your shirt or trouser pocket with the pocket clip and then you just have to reach out.

ARGENTAX CUTTEX 18 MM  
NO. 46202.08

**Classic cutter. With an 18 mm polystyrene blade.**  
If you are looking for a mature cutter with a variable blade extension, the ARGENTAX CUTTEX 18 MM with a wide polystyrene blade is a very good choice. Just like its narrow „brother“, the ARGENTAX CUTTEX 9 MM, it fits very well into your hand. But it is not just useful for cutting cardboard boxes, cardboard and paper, but also adhesive and other types of tape. You can easily change the bendable blade.

90% of original size

**Light and handy**  
The long plastic handle lies very comfortably in your hand. It is also rounded off at many points to make handling even more pleasant and comfortable for you.

**Easy blade changing**  
Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

ARGENTAX JUMBO  
NO. 67179.01

**A unique mass. With a polystyrene blade.**  
The name „ARGENTAX JUMBO“ arouses certain associations and there is no doubt that they fit this cutter. Its strong appearance goes hand in hand with a distinguished cutting performance. With its 0.50 mm strong and 18 mm wide polystyrene blade, you are very well equipped for all the usual cutting jobs. You can fix the blade extension as you wish using the locking screw between 4 and 80 mm.

**Extremely robust**  
Outer appearances don't deceive. The ARGENTAX JUMBO is a very stable cutting tool made of die-cast aluminium. The bendable polystyrene blade is also very durable.

**Easy blade changing**  
And that too without a tool. Pull off the handle cap at the back, release the locking screw and take it out of the handle together with the blade holder. Now you just have to change the blade.

**Flexible blade extension**  
Cardboard box, film or sacks? Foam or PVC? It's all the same. You can adapt your cutter flexibly to the respective conditions through the adjustable blade extension.

**Ergonomic handle**  
There is evidence of ergonomics at many places on the ARGENTAX JUMBO. The handle is slightly arched and therefore fits very well into your hands. The grooves at the front give you an even better grip.

# ARGENTAX REGELBAR

## NO. 12552.02

### Can do a lot and bear with a lot. With the trapezoid blade.

The ARGENTAX REGELBAR made of aluminium has always had its faithful supporters. It's hardly surprising as this all rounder can do all the usual cutting tasks. You can fix the extension of the trapezoid blade using the slider at different levels. So you adjust your cutting tool again each time after you use it. There are also no less than four spare blades in the handle.

#### Robust Design

As you can see and feel, the ARGENTAX REGELBAR is extremely stable. And flexible, since you can use a large number of blade shapes. The product is therefore suitable for any cutting application. Except power cuts.

#### Made of solid metal

The ARGENTAX REGELBAR is a tool cast as one. Abrasion resistant aluminium, to be precise. For certain industries, e.g. the food industry, this product also exists unpainted.

#### For right and left

Why is the ARGENTAX REGELBAR suitable for right and left handers? Well, it's just because the slider is on top of the handle. Once the blade has been driven out, you can use it continuously.

#### Double cutting edge blade

Before you have to change the quality blade, you can turn it over once. This will double the usage time of the blade - and reduce the energy you spend. Because your product will cut like new again.

#### Practical eyelet

You don't have to do without the eyelet with the ARGENTAX REGELBAR. You can just pull a strap through and hang up the cutter wherever you need it.

ARGENTAX MULTIPOS
NR. 00915210.02

An energy package for any kind of job. With a trapezoid blade. There are a couple of substantial reasons that favour the ARGENTAX MULTIPOS - in the true sense of the word. The fully revised cutter is made entirely out of zinc. An improved ergonomic design goes hand in hand with the familiar high degree of versatility and robustness. So you can work with the ARGENTAX MULTIPOS on various cutting materials. The blade extension can also be adjusted to several levels. As an „emergency reserve“ there are five spare blades in the handle.

Stable Design
As you can see and feel, the ARGENTAX MULTIPOS is extremely stable. And flexible, since you can use a large number of blade shapes. The product is therefore suitable for many cutting applications.

Made of full metal
The ARGENTAX MULTIPOS is a tool that seems to be made of one casting. Zinc die casting, to be precise. For certain industries, e.g. the food industry, the product is also available unpainted.

For right and left handers
As you can see, the slider is on top of the handle, and can therefore be operated in the same way for the left and the right thumb. The ergonomically shaped handle also fits into any hand.

2-cutting edge blade
Before changing the quality blade, you can turn it over once. That doubles the usage time of the blade and reduces the energy you spend. Because your product cuts like new again.

It's all in the handle.
You will find no less than five spare blades in the handle of the ARGENTAX MULTIPOS. With this stock of trapezoid blades, nothing stands in the way of a consistently high cutting performance.

ARGENTAX SPEZIAL  
NO. 11000.01

You decide what will become of it.

A proven type of cutting tool that can be used in many ways? That would definitely apply to the ARGENTAX SPEZIAL which has been a part of our product range successfully for a long time. You will not only receive the ARGENTAX SPEZIAL without a fitted blade. Therefore, please continue to help yourself from our large range of blades to fit your cutter depending on the use.

**Robust Design**  
The ARGENTAX SPEZIAL is made of aluminium. Its advantage: maximum protection from abrasion in everything you do. Moreover, the grooves at the front of the handle ensure a better grip.

**Blades to choose from**  
We supply the ARGENTAX SPEZIAL without a blade. Choose for yourself out of a large number of suitable alternatives. You can adapt yourself and your cutter flexibly to every new cutting job in this way.

**For left and right handers**  
Your cutting tool has been designed for right and left handers. You do not have to use a slider, since this is a fixed blade.

**Practical eyelet**  
You do not have to do without an eyelet in the ARGENTAX SPEZIAL. You can just pull a strap through it and attach the cutting tool wherever you need it.

ARGENTAX CLEVERCUT  
NO. 474.08

**Many meaningful details - in the narrowest space.**  
The ARGENTAX CLEVERCUT is a box-cutter with manual blade retraction. You can extend the blade with a slider. It is available in the box to you until you move it back into the handle yourself. The cutting depth is so low, that the blade can hardly harm your goods.

**4-cutting edge blade**  
Your quality blade has four sharp edges. So you just have to turn over the blade and cut like new again.

**Ergonomically shaped**  
You will find the ARGENTAX CLEVERCUT small, light and handy right away. But please also note the rounded off edges on the side of the handle. It lies even better in your hands in this way.

**Easy blade changing**  
You only have to press the slider lightly downwards and press it into position right at the front, and the blade holder protrudes out of the handle. The cover automatically raise itself and the blade is free to be changed.

**Transport safely**  
If you move the slider to the back position, the blade disappears into the handle again. And it stays there too. Because the built-in lock prevents involuntary slipping back.

ARGENTAX FILIUS  
NO. 19152.02

Big in matters of versatility. With a trapezoid blade.

The ARGENTAX FILIUS is a small cutter with manual blade retraction that can be used in a variety of ways. It has a preference for cardboard and film. You can push the blade outwards in three different cutting depths through the adjustable slider. Or back into the handle to hide it safely. You can choose between several blade variants, from stainless to rounded.

**Easy blade changing**  
The ARGENTAX FILIUS has been designed so that changing blades is effortless. Just press the slider downwards and guide it at the back out of the handle. And the blade is ready to use.

**Double cutting edge blade**  
Before you have to change the quality blade, you can turn it over once. This will double the usage time of the blade - and reduce the energy you spend. Because your product will cut like new again.

**Small, light, handy**  
These are all properties that will assist you in working without fatigue. In addition, there is another useful detail: the grooves at the front of the handle. So that you don't lose your grip.

ARGENTAX CLAP  
NO. 579.08

**It fits. Even into the smallest pocket.**  
MARTOR and pocket cutters? Why not! With the ARGENTAX CLAP you can actually fold the quality blade in and out. When the blade is open you can carry out many different easy cutting jobs with it. When you fold it back into the handle, you have placed your cutting tool in a safe condition.

**Easy to open**  
The ARGENTAX CLAP is small, light and handy. The grooves in the blade carrier and the notch in the handle ensure even easier pulling out of the blade.

**Transport safely**  
Pocket cutters, as the name already suggests, want to be transported in your pocket. That's not a problem with the ARGENTAX CLAP. Once the blade has retracted into the handle, it won't come out by itself.

**No blade changing**  
The ARGENTAX CLAP is a disposable cutter. Since blade changing is not possible, you can't lose the blade either.

**Practical eyelet**  
As an alternative to your pocket, the ARGENTAX CLAP also feels good on your belt loop or on your wrist. Just pull a thin strap through the eyelet and attach it as you like.

Blade thickness 0.30 mm.

# ARGENTAX TEXI

## NO. 79000.05

### Hardly bigger than the blade itself.

Even if it looks like it, the disposable cutter, the ARGENTAX TEXI is not meant for shaving. What you get, rather, is a small separating cutter you can use for very different purposes. Place your fingers on the blade holder when cutting! You can fold the blade back into the handle after use to „de-sharpen“ your cutting tool.

# ARGENTAX KEY-SHAPED CUTTER

## NO. 312.08

Application

### Little helpers - for the very small jobs.

This cutting tool makes a point with its unusual key shape. One can hardly imagine that a quality blade fits in here and can be released with a slider. But the word „impossible“ doesn't exist at MARTOR. It's best to use the snapp-off blade, adjustable at three levels. for easy cutting jobs. After the work is done, pull the blade back into the „key.“

ARGENTAX RAPID  
NO. 594.03

**Two blades, one goal: silicon.**  
The ARGENTAX RAPID has found its purpose: silicon cartridges. It has two blades to deal with them. One small pointed one, that you can use to scratch and cut open the plug. And a rectangular one which caps the spout opening like a guillotine according to the thickness you require. Nothing can then come in the way of your actual work, such as renewing joints.

**Two functions**  
Ever had problems with a silicon cartridge? First of all, with the closed plug? And right after that, the spout opening, that is too narrow? The ARGENTAX RAPID can provide first class cutting in both cases.

**For left and right handers**  
It makes no difference whether you are left or right handed when using the ARGENTAX RAPID. You will always work with the same precision. Any hand can take care of the ARGENTAX RAPID.

**Practical eyelet**  
You won't have to do without it in this special cutting tool: the practical eyelet for attaching. So you can hang up the ARGENTAX RAPID safely, and always find it again.

**Safe when you are on the go**  
The cutter has a protective cap to ensure that personal transporting is safe. It covers the pointed blade. The sharp edges of the second blade are best stored in the handle.

# ARGENTAX MITRE CUTTER NO. 57542.02

**Chamfer on insulation boards? No problem.**  
Unusual name, unusual tool. Using the ARGENTAX MITRE CUTTER you can prepare insulation boards at thicknesses of up to 15 mm . Specifically, you cut at a 45 degree mitre using the two slanted blades. You can then join the two boards to fit exactly. Cutting tasks are made easier through an ergonomically designed handle and the smooth, slideable underside. In addition, the handle holds five spare blades.

**45 degree cutting angle**  
Whether at home or at work: as a craftsman, any relief in your work is welcome. That's why the cutting angle of the two trapezium blades has been precisely adjusted. The smooth bottom surface also slides easily over the material.

**Double cutting edge blade**  
Before changing the quality blade, you can turn it around once. That doubles the usage time of the blades and reduces the energy you spend. Because your product will cut like new again.

GRAFIX

GRAFIX BOY  
NO. 31172.00

If you are particular about details. With a prominent tip. GRAFIX BOY is something of a „fine fellow“ among scalpels. That’s because it is suitable for particularly precise and delicate cutting work. Or for careful erasing. You hold the cutting tool made of aluminium in your hand as you would hold a writing instrument. It is also very uncomplicated to handle, for example, blade changing.

**Made of aluminium**  
The heading already says everything. The GRAFIX BOY is an extremely robust cutting tool. Whether as a handyman, artist or graphic designer - you will definitely count the scalpel as one of your assistants for a long time.

**Easy blade changing**  
Changing blades is so easy, that you only need to remember the following: turn open the knurled nut and release the blade holder. Take out the blade, put in the new one, done.

**Light and handy**  
GRAFIX BOY convinces you with its light and handy appearance. The pen-type handle ends in a knurled nut which prevents your fingers from slipping.

GRAFIX 502  
 NO. 502.00

**Cutting, deburring? You can start afresh with this tool.**  
 In future the „old boy“ will start out under the new name GRAFIX 502. The timeless scalpel is a big help if you want to cut and deburr - for example when constructing models. The pen-shaped rounded handle enables highly precise cutting. Furthermore, the GRAFIX 502 is made of aluminium to provide a long service life.

GRAFIX 503  
 NO. 30128.00

**Even the name is clear cut.**  
 The former „big boy“ responds to a new name. But even as GRAFIX 503 it remains the exact aluminium scalpel you know and value. So you can use it to cut and deburr during model construction, for example. It is also suitable for cutting film, paper or textiles accurately. It lies very comfortably like a high quality writing tool in you hand.

**GRAFIX 501**  
 NO. 501.00

**The artist among scalpels.**

Are you from an industry where the details matter? The GRAFIX 501 is made for all fine cutting work - as well as for erasing. Advertising agencies and technical offices therefore reach out for the GRAFIX 501. It's also because the exceptionally large variety of blades will encourage your creativity.

**Robust Design**

The handle and knurled nut are made completely out of aluminium. For you, this means that you can definitely count the GRAFIX 501 as your companion for a long time.

**Easy blade changing**

And how easy it is: You turn open the knurled nut and you can then take out the old blade. The choice of new blade is more difficult as there is a wide range of alternatives.

**Easy and handy**

The GRAFIX 501 not only looks like a pen it also feels like one in your hand. The grooves on the knurled nut contribute to this feeling. An open view on to the point of cutting in is also an advantage.

**A wide range of blades**

0.50 or 2 mm thick, needle type or rounded, single and double edge grounded? As you can see, there are no limits to the imagination as far as blade varieties are concerned.

# GRAFIX TIP CUT NO. 490.00

## Cutting instead of writing. Your „Pen“ with a blade.

Even something like this is available at MARTOR: Just as in the case of a ball-point pen, you press the pusher at the top – and the blade comes out at the bottom. Since the GRAFIX TIP CUT can be guided just as accurately as a pen, it is suitable for all delicate and sophisticated cutting work. For example, for cutting through paper, foil or textiles. Similarly, you can sink the blade back into the handle by pressing the pusher. It cannot get easier than this.

# GRAFIX SCALPEL SMALL NO. 23111.55

The kind of scalpel one wishes for. With a prominent point. A picture book scalpel in form and function - or just one from the MARTOR range of products. You can work on graphic paper, film sheets and much more with the GRAFIX SCALPELL SMALL. Since it is made out of chrome plated steel, you can easily place more stress on it. In this variant we have fitted a small scalpel blade with a prominent point.

Application

## ACCESSORIES

	USED BLADE CONTAINER	NO. 9810.08
	WALL MOUNT BRACKET USED BLADE CONTAINER	NO. 9845.06
	SAFEBOX	NO. 108000.00

### Stable Design

No wonder, since your precise cutting tool is made 100% out of forged and chrome plated steel. This robustness will definitely benefit you in your daily work.

### A wide variety of blades

You will definitely also like the large selection of blades provided for this scalpel. So you can re-equip your product depending on preference and cutting material with a few hand grips.

### Tool-less blade change

You can lift the blade a little at the back with one hand. At the same time, you pull it out at the front with the other hand. Now insert the new blade, ready.

### Ergonomic handle

In spite of the material, your scalpel is lightweight. The rounded-off handle end and the grooved surfaces for a firmer grip are pleasant additions. The open view of the cutting point also assists you in your work.

# GRAFIX SCALPEL PLASTIC

## NO. 20121.00

Go ahead and be quite precise. With extra-long blade.

The GRAFIX SCALPEL PLASTIC belongs to our family of classic scalpels. In it, you will find an established tool whenever you have to precisely cut paper, film or textiles. It has its followers among graphic designers as well as model builders. In this variant you work with a large scalpel blade which, with its rounded off point is especially suitable for lighter loads.

### Application

### PRODUCT FEATURES NO. 20121.00

#### Technical features

#### Main cutting materials

### PRODUCT DETAILS

Main material	Plastic
Knife size (L x W x H)	149 x 4.8 x 13.9 mm
Weight	5.1 g
Weight per unit (self-service card)	16.0 g

### ACCESSORIES

	USED BLADE CONTAINER	NO. 9810.08
	WALL MOUNT BRACKET USED BLADE CONTAINER	NO. 9845.06
	SAFEBOX	NO. 108000.00

#### A wide variety of blades

You will definitely also like the large selection of blades provided for this scalpel. So you can re-equip your product depending on preference and cutting material with a few hand grips.

#### Easy blade changing

You can lift the blade a little at the back with one handle. At the same time, you pull it out at the front with the other hand. Now insert the new blade, ready.

#### Easy and handy

The light plastic handle earns many plus points as far as ergonomics is concerned, e.g. through the pleasantly rounded off handle end and the grooves for a better grip. You will then have an accurate view of the cutting point.

### ALL VARIANTS

	GRAFIX SCALPELL PLASTIC with extra-long blade 1 on self-service card (10 in multipack)	NO. 20121.00

GRAFIX CLAPPEX SMALL  
 NO. 20500.00

Precision you can fold out.

The GRAFIX CLAPPEX SMALL is a very good choice for anyone who likes to work with fine scalpel blades. It is ideal for cutting graphic paper or working on film. Its highlight is the foldable blade holder made of forged steel that disappears into a plastic handle. Apart from the mounted blade, you can expect a large number of optional blades - the right one for every use.

**Robust Design**  
 A scalpel blade in a steel holder; if you still have doubts about the robustness of this cutting tool now, you should really try it out once.

**A wide range of blades**  
 Considering the large number of suitable blades, you can adjust the GRAFIX CLAPPEX SMALL time and again to suit your needs. That's also why we have designed blade changing to be as easy as possible.

**Easy blade changing**  
 Your own two hands are enough as a tool. You only need to lift up the end of the blade at the back slightly and pull the blade to the front.

**Retractable blade**  
 To transport the GRAFIX CLAPPEX SMALL safely, fold the blade holder together with the blade into the plastic handle.

**Practical eyelet**  
 You don't have to do without an eyelet with the GRAFIX CLAPPEX SMALL. You can just pull a strap through it and hang up the cutter wherever you need it.

Labels and stickers, paint and varnish residue, glues and mortar all get where they don't belong, for example on the floor, the wall or a work surface. This is no problem when you go to work on them with a professional scraper. With SCRAPEX tools by MARTOR you can clean all smooth surfaces carefully without leaving a trace.

SCRAPEX

SCRAPEX ARGENTAX  
NO. 46144.02

Top forming, top form.

It really feels good, the large, rounded handle of the SCRAPEX ARGENTAX. But even the performance of this classic scraper convinces. So you can free all smooth surfaces from residue and remains with it - no matter whether at work or at home. When you're done, push the protective cap over the blade, and everything is safe.

85% of original size

**Especially ergonomic**  
Ergonomics is not the exception with us, but the rule. Even a scraper like the SCRAPEX ARGENTAX waits for you with a rounded handle, which you would gladly also hold for longer in your hand.

**Large blade extension**  
There is comparatively a lot of blade available for a scraper. The advantage: You can reach between the surface and remains of the glue much more easily and can then remove it much more easily too.

**Flexible to use**  
The SCRAPEX ARGENTAX is very suitable for flat scraping angles. So you can depend on your scraper even in difficult situations.

**For right and left**  
The SCRAPEX ARGENTAX fits into every hand. No matter whether it's your right or your left hand. Because the handle has been shaped in such a balanced way, that no type of handling is preferred or neglected.

**Easy blade changing**  
And that completely without a tool: you just have to push the blade to the side and take it out.

SCRAPEX 596  
NO. 596.03

**Nothing stays behind except satisfaction.**  
The SCRAPEX 596 is the largest scraper in our product range together with the even longer SCRAPEX 5196. Use it for effortless removal of stickers, labels and other paper, colour and paint residue on all smooth surfaces. You can work especially effectively with the 100 mm long blade. Your professional tool also convinces with a non-slip handle and the built-in safeguard.

70% of original size

**Robust and durable**  
The 11 cm long handle is made of die-cast zinc. What does that mean to you? Definitely a scraper with a long life, also armed for the hardest of jobs.

**Broad user surface**  
Considering it has a blade length of 100 mm, you are already working on a large area of use. So you clearly don't have to use your scraper very often to clean a certain surface.

**Safeguard included**  
To cover the wide blade, release the special screw manually and push the blade cover to the front with your thumb. Now turn the screw on again to shut it and everything is safe.

**Non-slip handle**  
A tool of such dimensions should not slip in your hands. Of course, we have thought of that - and have therefore equipped the handle with a non-slip soft-grip and small pores that are friendly to the hands.

**Easy blade changing**  
The special screw will also help you change blades. Turn it open and remove the blade cover. Now you can take out and change the blade.

SCRAPEX CLEANY  
NO. 544.00

What it does? Clean work.

Labels on the floor? Remains of materials tightly stuck? You can easily clean all smooth surfaces with the SCRAPEX CLEANY. The handy scraper is made of plastic. You can push its blade out of the handle with the practical slider, and after use, push it back in again to store it safely. Blade changing is also as easy as pie.

**Good handling**  
The end of the handle is rounded so that it doesn't press into your hand. The grooves on the slide and in the front handle area also make your work easier. And the integrated blade magazine is comfortable too.

**Transport safely**  
You don't just release the blade with the slide but also pull it back into the handle. It remains tight and safe there - so that you can transport your cutting tool without any problems.

**Easy blade changing**  
Changing blades is possible without tools. You press the slider as far as possible to the front with your hand and release the blade in this way. Now you can push it out to the side.

**Practical eyelet**  
You do not have to do without the eyelet with the SCRAPEX CLEANY. You can just pull a strap through it and hang up the scraper wherever you need it.

**For right and left**  
The SCRAPEX CLEANY fits into every hand, no matter whether it's your right or left hand. Because the handle has been shaped in such a balanced way that no type of handling is preferred or neglected.

# SCRAPEX MARTELL

## NO. 47137.02

### And everything goes smoothly.

A very normal scraper at first glance. When looking at it a second time, it is a tool that clearly offers more. The SCRAPEX MARTELL will assist you perfectly when removing labels and when cleaning glass-ceramic cooking areas. After the work is done, you can shield the blade safely by pushing the blade cover to the front. Just a bit further forwards and the blade is ready for changing.

**Small, light, handy**  
These are all properties you wouldn't like to miss in a multi-purpose scraper. Its compact dimensions go hand in hand with the ergonomic handle shape. The plastic is heat resistant up to 70 degrees.

**Double cutting edge blade**  
Before you have to change the quality blade, you can turn it over once. This doubles the usage time of the blade - and reduces the energy you spend. Because your product immediately cuts like new again.

**Includes safeguard**  
It functions really easily by pushing the flexible blade cover over the blade you secure your scraper.

**Easy blade changing**  
The blade cover also plays a crucial role when changing the blade. Once it has been pushed completely out of the handle you can then take out the blade from the side.

**For right and left hander**  
The SCRAPEX MARTELL fits into every hand, no matter whether it's your right or left hand. Because the handle has been shaped in such a balanced way that no type of handling is preferred or neglected.

SCRAPEX INOX  
NO. 592.02

**Protection from rust. Protection for you.**  
The name itself, SCRAPEX INOX, carries one of its most important properties. The classic scraper is made of stainless steel, which is beneficial when used in the kitchen to clean glass-ceramic stove tops, or to clean other smooth surfaces. Another advantage: you can safely cover the blade by pushing the upper half of the handle right to the front.

**Double-edged blade**  
Also the SCRAPEX INOX is fitted with a 2-times usable quality Solingen blade. You can use a stainless steel 0.30 mm blade as an alternative to the fitted 0.20 mm blade.

**Blade can be changed**  
The only thing you need for it is a normal slit screwdriver. Loosen the screw, remove the half of the handle - and the blade is ready to change.

**For right and left hander**  
The SCRAPEX INOX fits into every hand, no matter whether it's your right or left hand. Because the handle has been shaped in such a balanced way that no type of handling is preferred or neglected.

TRIMMEX

TRIMMEX CURVEX  
NO. 510.00

Burr after burr, all around.

Nomen est omen - the name says it all. The TRIMMEX CURVEX is best used to deburr plastic and metal parts. The bent blade that can be rotated will especially benefit you in rounded off materials since it automatically takes on the best possible position. So you can clean your materials - even in difficult to access areas.

Robust Design

You can rely on our quality. The stable handle ends in a knurled nut. Its purpose is to lock in position the extendable rod shaped blade holder.

Ergonomic handle

The handle of the TRIMMEX CURVEX thickens towards the middle. So it fits particularly well in your palm when working. The grooves on the knurled nut give your fingers and even better grip.

Easy blade changing

It's easy to change the blade. Turn the knurled nut open and take the holder out of the handle. Now pull the flexible area downwards and remove the blade.

Lengthened handle

The blade holder can be driven out up to a maximum of 95 mm. You can therefore work on places that seem difficult to reach. The holder can also take up blades on both sides - with different diameters.

TRIMMEX FORTEX  
NO. 507.00

Doesn't show any weaknesses. Not even with stronger burrs. You would like a stable deburring cutter? With an ergonomic handle and a meaningful selection of blades? The TRIMMEX FORTEX will fulfil this wish for you. And a few wishes too. Because your cutting tool can confront stronger burrs too. You are well served with this tool as far as the professional deburring of plastic parts is concerned.

**Robust Design**  
You can use the TRIMMEX FORTEX for longer, because it has a stable build. Just one example: the robust aluminium blade holder, which firmly surrounds the blade.

**Ergonomic handle**  
The handle of the TRIMMEX FORTEX doesn't only get thicker towards the middle. It is also rounded off on all sides. That's why it lies especially well in your hand.

**Easy blade changing**  
At some point or the other, the moment comes where cutting performance declines. That's not a problem. Just screw on the knurled nut and take out the old blade. Put the new one in and off you go.

**Different blades**  
Keep adapting the TRIMMEX FORTEX to your demands and needs. By changing the bent blade for a straight one, for example.

## NO. 595.00

### A specialist in glued edges.

If you approach MARTOR with special wishes, you can expect special solutions. The TRIMMEX KANTEX is that type of special case. You can use it ideally to cut glued edges. Depending on the use, you can turn the blade through 90 degrees - and work, now with a pushing, now with a pulling movement in this way.

#### Robust Design

No matter how much you turn and turn around the TRIMMEX - nothing wobbles here. The massive handle ends in the metal blade carrier with edges.

#### Ergonomic handle

The TRIMMEX KANTEX has a rounded off handle suited to your hands. The guide through the blade carrier and open visibility of the cutting point also assist you in precise cutting.

#### Double cutting edge blade

Before you have to change the quality blade, you can turn it over once. This will double the usage time of the blade - and reduce the energy you spend. Because your product will cut like new again.

TRIMMEX SICUREX  
NO. 40140.00

**Not everyone can do glass. This one can.**  
MARTOR's motto applies here too: there is a solution for every cutting problem. The TRIMMEX SICUREX is a special tool for cutting laminated glass. The adjustable handle allows you to work without fatigue and pressure points don't even form on your hands. The transparent forked head has also been designed in such a way that you cannot scratch your sensitive glass surfaces with it.

**Easy blade changing**  
You will definitely be able to change blades without a tool. Push the transparent forked head towards the front to release the blade. Now you can turn it or change it.

**Ergonomic handle**  
The ergonomics of the TRIMMEX SICUREX is apparent at many places. The handle is not just comfortably rounded off, but the grooves at the front also prevent you from slipping.

**Light and handy**  
The well thought out ergonomics goes hand in hand with a slender appearance: you will be able to value the lightness and handiness even more after you have worked for longer with your cutting tool.

**Right adjustment**  
Another comfortable feature waiting for you in the TRIMMEX SICUREX: you can extend the hand by simple turning and pulling and adapt it flexibly to your needs in this way.

TRIMMEX SUPERTRIM  
NO. 87606.00

Grows with its tasks. With a rounded off blade.

Deburring or cutting? Basically, you can do both with the TRIMMEX SUPERTRIM. You have a 0.50 mm strong blade with a rounded off point at hand in this variant. Ideal for removing excess material and for cutting work with paper and card-board. The TRIMMEX SUPERTRIM also scores high in terms of comfort. An example: you can adjust the handle length individually, depending on hand size.

**Easy blade changing**  
One could also describe it as intuitive. You can push the blade holder right to the front, so that you can remove the blade. Put in the new one, replace the holder, done.

**A wide variety of blades**  
Count for yourself. The exact blade to suit your needs just has to be there among this unusually wide selection of blades. Meaningful and safe: many of the blades can be concealed in the handle.

**Ergonomic shape**  
With the rounded off handle in your hand you can work free of fatigue over a longer period. Pressure points on your palms? Not an issue for you.

**Flexible blade extension**  
You decide for yourself how far the blade should protrude out of the holder. You can then keep fine tuning the cutting tool depending on the use.

**Handle that can be turned**  
Why a handle that can be turned? Because you can lengthen or shorten the handle in this way, so it will fit even better in your hand - and with the respective job.

TRIMMEX SUPERTRIM  
NO. 87791.00

**Grows with its tasks. With a rotating deburring blade.**  
Deburring or cutting? Basically, you can do both with the TRIMMEX SUPERTRIM. There is an additional adapter in the blade holder in this variant so that you can use the 2.60 mm strong deburring blade. You can smooth down unclean work-pieces with it. The TRIMMEX SUPERTRIM also scores high points due to its immense comfort. An example: you can ad-just the handle length individually, depending on hand size.

**Easy blade changing**  
One could also describe it as intuitive. You can push the blade holder right to the front, so that you can remove the blade. Put in the new one, replace the holder, done.

**The correct angle**  
No matter whether it is a fitted or an optional blade: The rotating deburring blades in the TRIMMEX SUPERTRIM automatically take on the correct angle to the workpiece. So you can avoid damages.

**Ergonomic shape**  
With the rounded off han-dle in your hand you can work free of fatigue over a longer period. Pressure points on your palms? Not an issue for you.

**Handle that can be turned**  
Why a handle that can be turned? Because you can lengthen or shorten the handle in this way, so it will fit even better in your hand - and with the respective job.

# TRIMMEX CUTTOGRAF

## NO. 69606.00

### Discover its talents. With a rounded-off blade.

A cutting tool that offers you a whole lot of possibilities? MARTOR has plenty of those. Like the TRIMMEX CUTTOGRAF with which you can cut and deburr effortlessly. We have fitted a blade with a rounded-off point in this variant which we recommend for both types of work. You can adjust the blade extension individually according to the material and the use.

**Easy blade changing**  
One could also describe it as intuitive. You can push the blade holder right to the front to remove the blade. Put the new one in, replace the holder, ready.

**A wide variety of blades**  
Count for yourself. There is definitely the right one for you among this unusually large selection of blades. Meaningful and safe: many of the blades can be lowered into the handle.

**Easy and handy**  
Working comfortably also always depends on the handiness of the tool. That's why the handle of the TRIMMEX CUTTOGRAF is ergonomically shaped. The grooves on the top and at the bottom give you an even better grip when cutting.

**Flexible blade extension**  
You can decide for yourself, how far the blade should protrude out of the holder. So you can finely adjust the cutting tool time and again after each use.

**Practical eyelet**  
You do not have to do without an eyelet in the TRIMMEX CUTTOGRAF. You can just pull a strap through it and hang the cutting tool up wherever you need it.

TRIMMEX SWIVEL  
NO. 171797.00

**Deburring? You'll soon get the hang of it.**  
The TRIMMEX SWIVEL no longer has „Maxi“ in its name. Still, this deburring cutter continues to provide you with maximum flexibility as far as the materials to be worked on are concerned. So you can deburr the round parts and edges of plastics, steel, aluminium and copper on the inside with the TRIMMEX SWIVEL. The sting: the blade, stored so that it can rotate, always adapts the suitable angle to the workpiece.

**Easy blade changing**  
And this is how: you turn the handle head to „Open“ and can remove the old blade at once. Put the new blade in and replace the handle head to „Lock.“

**Ergonomically shaped**  
We have put grooves into the plastic handle of the TRIMMEX SWIVEL. For two reasons: they are non-slip, which means your tool can't just roll away like that.

TRIMMEX PELLEX  
NO. 850.04

The narrow burr is its ambit.

After you have injected, drilled, milled and cut out your work-piece, there is a final work step: deburring. Anyone who wants to be precise here, will be very well equipped with the TRIMMEX PELLEX. Its V-shaped sharpened blade can best be used for cutting extra thin plastic skins. Make use of the large range of alternative blades for other applications.

Robust Design

The handle is as robust as the working method is delicate. It is 100% aluminium. The blade holder is also so stable that you will get more out of your cutting tool for longer.

Easy blade changing

As you already know about MARTOR, blade changing will not pose any problems to you here either. Release the knurled nut, open the blade holder, remove the blade and change it.

Light and handy

Exact cutting requires a steady hand. That's why the rounded off handle lies in your hand as comfortably as a writing tool. The exact cutting point will always be visible to you while you do so.

A wide variety of blades

The blade holder in the TRIMMEX PELLEX has been designed in such a way that you can insert different kinds of blades. Whether for fine or rough work - there is a large selection.

TRIMMEX GRATEX  
NO. 111605.00

**A fine tool. Even for tougher uses.**  
Beautifully shaped and flexible - you can easily carry out all fine and even rough deburring work with the TRIMMEX GRATEX. Plastics are its preferred area of work. But it provides valuable services in crafts and in graphic arts too. The long handle gives you enough space to maintain a relaxed hand position.

**Robust Design**  
Most of the handle of the TRIMMEX GRATEX is made of abrasion resistant aluminium. So you have a „colleague“ with excellent stamina in your hand.

**Ergonomic handle**  
At MARTOR, quality and comfort go hand in hand. In the TRIMMEX GRATEX, you will soon notice that the round parts on the handle have been placed exactly at the right point.

**Small, light, handy**  
The TRIMMEX GRATEX has quite a bit to offer in terms of precise and continuous work. Apart from its low weight, open visibility of the cutting point is among its advantages.

**Easy blade changing**  
You only have to observe the following to do so: to release the blade lock, move the grooved slider to the back. Now you can pull out the blade towards the front.

TRIMMEX SIMPLASTO  
NO. 514.00

**Metal on the inside, plastic on the outside, round at the front.**  
The TRIMMEX SIMPLASTO is something like a twin of the TRIMMEX SIMPEL. The only difference is that it is covered with non-slip plastic. It is best used for fine and precise cutting work with paper and cardboard. Or you can deburr different types of plastic parts with it. You can safely shield the pointed blade with the plastic cap included.

**Particularly robust**  
And not without a reason: the handle is made completely of aluminium on the inside, the blade itself has been attached with two metal screws. So you can rely on the stability.

**Particularly slip resistant**  
Because the aluminium core is surrounded by plastic, it increases the slip-resistance of your cutting tool. So you can even hold the TRIMMEX SIMPLASTO firmly with sweaty hands.

**Practical eyelet**  
You don't have to do without an eyelet in the TRIMMEX SIMPLASTO. You can just pull a strap through it and hang up the cutter wherever you need it.

TRIMMEX SIMPEL  
NO. 513.00

**High performance per gramme. With a rounded off blade.**  
At only 17 grammes, the TRIMMEX SIMPEL hardly carries any weight. Its capacity is all the more remarkable. You can use it effortlessly to deburr different types of plastic parts. Or use it for fine cutting work with paper and cardboard. The rounded off blade tip serves to protect you by de-sharpening your tool at that point.

**Particularly robust**  
And not without a reason: the handle is made completely of aluminium, the blade itself has been attached with two metal screws. Just doing the best we can.

**Precise work**  
The TRIMMEX SIMPEL can be used for delicate work, similar to a medical scalpel. Its non-slip surface will also help you do very precise work.

**Practical eyelet**  
You don't have to do without an eyelet in the TRIMMEX SIMPEL. You can just pull a strap through it and hang up the cutter wherever you need it.

	GRAPHIC BLADE 0.50 mm, rounded blade tips, cutting edges TiN coated, 100 in safety dispenser	NO. 8629.65

TRIMMEX CERACUT  
NO. 170170.00

**Ceramic for deburring. With a straight blade.**  
Why are ceramic blades ideal for deburring plastics and metals? Because they are very resistant und durable due to their enormous hardness. That's why the TRIMMEX CERACUT can smooth edges and remove sprayed points and separation lines from mould halves. Furthermore, the characteristic grinding of the MARTOR ceramic blade minimizes your personal risk of injury.

**Straight blade**  
The straight but slightly arched cutting edge enables you to remove excess material exactly in line with the contours and to improve surfaces. It's best to store spare blades in the handle.

**Easy blade changing**  
Just remove the cutter cap at the back and push the round opening further to the front. Turn it around once - and the blade has been released.

**Space for spare blades**  
Under the cap also lies concealed an ideal storage place for your spare blades. Cap down, blades in - and always at hand, until needed.

ACCESSORIES

# BELT HOLSTER L WITH CLIP NO. 9922.08

**Everything always at hand: BELT HOLSTER L.**  
What do you do with your cutting tools when you are not actually using them? The MARTOR BELT HOLSTER L is a robust holder that allows you to carry all large MARTOR cutters as well as our safety scissors at all times. In addition, the interior and exterior pockets are designed to allow you to load different tools: for example you can carry an extra cutter, a pen and a pack of blades. The MARTOR BELT HOLSTER is the ideal place to stow your tools safely when moving from A to B - and have them at hand, as soon as they are required.

Application

# BELT HOLSTER M WITH CLIP NO. 9921.08

25% of original size

**Everything always at hand: BELT HOLSTER M.**  
The MARTOR BELT HOLSTER M is a robust holder that allows you to carry all midsize MARTOR cutters as well as our small scissors at all times. In addition, the interior and exterior pockets are designed to allow you to load different tools: for example you can carry an extra cutter, a pen and a pack of blades.

Application

# BELT HOLSTER S WITH CLIP NO. 9920.08

25% of original size

**Everything always at hand: BELT HOLSTER S.**  
The MARTOR BELT HOLSTER S is a robust holder that allows you to carry all compact MARTOR cutters as well as our small scissors at all times. In addition, the compartments are designed to allow you to load different tools: for example you can also carry a pen or a pack of blades.

Application

**Certified safety**  
We always design our cutting tools to the highest standards. So why should our accessories be anything less? Our MARTOR BELT HOLSTERS were therefore tested for harmful substances and stability - and were found to be very good.

**Does it fit? Fits perfectly**  
Our MARTOR BELT HOLSTERS S, M and L are precisely tailored for our cutters - and not just that. Depending on the size of the pocket, it allows you to carry a combination of various tools: cutter/pen, cutter/scissors, cutter/pen/scissors etc.

**Intelligent spacesaver**  
With the MARTOR BELT HOLSTER you will always discover new storage options. A compartment here, a slot there - all designed so precisely to ensure the contents are kept as firmly as necessary while offering you maximum flexibility.

**2 attachment options**  
The belt holster can be attached to your belt in two ways: by clip-on or velcro fastener. Velcro is recommended for belts; the clip can also be used on many other areas of your clothing, such as your trouser pocket.

**Robust material**  
The BELT HOLSTER is now an integral part of everyday working life. So there is no inconvenience. This is further guaranteed by its durable nylon material, washable at 40°C, which is held together by double seams - even when subject to permanent use.

BELT HOLSTER S  
For example for  
- SECUNORM 380  
- SECUMAX 363

HOLSTER LARGE  
NO. 9843

50% of original size

**For our wider cutting tools.**  
Your cutting tool will feel comfortable in this „no-fuss‘ plastic HOLSTER. Attach it to your belt or with a clip to „utility“ pockets, or use it as a knife station at your workplace.

Application

HOLSTER SMALL  
NO. 9842

50% of original size

**For our more slender cutting tools.**  
This blue plastic HOLSTER is just like the black version, only smaller.

Application

SAFEBOX  
NO. 108000

60% of original size

**Your personal used-blade bank.**  
The SAFEBOX is large enough to store a large number of used blades safely. And at the same time, it is compact enough to carry with you. The two slits are not only used for filling, but also to „shorten“ your snap-off blades. When your SAFEBOX is full, empty it into your USED BLADE CONTAINER.

Application

USED BLADE CONTAINER  
NO. 9810

25% of original size

**For the final disposal of your blades.**  
You can fill the USED BLADE CONTAINER with the content of your SAFEBOX. Or directly with your used blades. When the box is full, turn the lid until it shuts. Now the box cannot be reopened. The next step is to safely and completely dispose of the filled USED BLADE CONTAINER.

Application

WALL MOUNT BRACKET  
USED BLADE CONTAINER  
NO. 9845

45% of original size

**Makes the USED BLADE CONTAINER accessible to all.**  
Include it in your order now! With this mounting bracket you can fix your USED BLADE CONTAINER to a central location. Use the clamp and screws and nuts supplied with the product to attach it to either a pipe or a rod.

OUR ADDITIONAL SERVICE MEDIA:  
BROCHURES, CATALOGUES ETC.

You can request these and all other service media directly from us – ideally by calling our service number or by visiting our website, where they are available for download.

**Safety knives and scissors**  
In this catalogue we present you our safety knives: high quality cutting tools equipped with reliable safety technologies such as concealed blade, fully automatic blade retraction and automatic blade retraction. Furthermore: our SOS and MDP (= metal detectable) cutters.

**Promotional knives brochure**  
Another MARTOR product family is our promotional knives. They are introduced to you individually in this brochure. No matter whether you work as a distributor for promotional products or whether, as a company or institution, you are looking for the ideal promotional gift for yourself or your target group.

OUR WEBSITE.  
WITH CUSTOMER-ORIENTED SERVICES.

When looking for the best possible product there is nothing like personal assistance, which is one of our strengths. Nevertheless, we would like to satisfy your needs in the best possible way also in other areas - e.g. on our website [www.martor.com](http://www.martor.com). Where you can find new functionalities, such as the product filter, providing you with an even better overview of our cutting solutions.

**Filter all**  
Which material do you want to cut? And what technical properties should your safety knives have? You can access a selection of suitable products quickly and comfortably through these and many other filter functions.

WWW.MARTOR.COM

**Compare all**  
No doubt there are cutting tools in our product range that are similar. So it's worth it to take a second view. With the functionality to compare products, you can select up to four cutting tools and check them against each other. Discover the product details to find the most suitable cutting tool.
