

Healthcare Flooring Solutions

Healthcare Flooring Solutions

*We're committed to helping
you create an environment that
supports the healing process,
reflecting a facility that's focused
on the highest quality care.*

All About Flooring.

Helping Bring Your Healthcare Designs to Life

WORKING TOGETHER FOR PATIENT HEALTH AND SAFETY.

Designing a safe and healthy environment—the kind that your patients and staff demand .

Secure footing and safety are built into every nora rubber flooring solution, including an increased coefficient of friction that reduces the risk of slips, falls and other incidents for patients and staff alike.

our rubber flooring is based on sustainable raw materials that offer numerous green advantages. They contain no PVC, and have received numerous certifications, including GREENGUARD® for indoor air quality, Corporate Environmental Commitment ISO 14001, and LEED version 2.2 credits. Our flooring solutions are also listed in GREENSPEC as contributing to the environmental performance of buildings.

Acoustics and Comfort: You'll appreciate ergonomic features and comfort underfoot that are ideal for areas where many staff members are constantly on their feet. You also get acoustic properties equivalent to those of commercial carpets for a quieter ambience that supports better quality care.

Durability and Longevity: Our flooring stands up to demanding healthcare traffic—gurneys, moveable beds, diagnostic machines and other heavy equipment—while retaining slip-resistant qualities for added safety.

Cleanliness and Hygiene: nora flooring requires no waxing, which eliminates the potential problems caused by bacteria trapped in the flooring. Bacteriostatic qualities help promote health and safety by preventing infection. And our flooring resists staining caused by the chemicals most commonly used in healthcare facilities.

*our flooring solutions
reduce noise—for a quieter,
healthier environment in
high-traffic areas.*

All About Flooring.

Corridors, Patient Rooms and Other General Areas

HELPING YOU ENSURE SAFETY AND HYGIENE.

Wherever patients, staff and visitors interact, maintaining a safe and hygienic environment is an ongoing challenge. Versatile rubber flooring solutions from nora help you meet that challenge—with rugged, slip-resistant surfaces that require less effort to disinfect and keep clean.

We can work with you to make sure you receive the health and safety benefits of superior indoor air quality with low VOCs—to help resist infection—and good slip resistance. nora flooring solutions resist stains caused by healthcare-related chemicals, and reduce maintenance needs—including needs for cleaning agents and maintenance personnel. Durable nora flooring will give you decades of low-maintenance life even under the heaviest traffic conditions.

You'll also appreciate superior underfoot comfort, benefiting staff members who stay on their feet for long periods of time. And everyone benefits from good acoustic properties—to promote a quieter, calming healthcare environment.

*With our flooring solutions,
everyone—surgeons, nurses and
technicians—will enjoy fatigue-
reducing comfort underfoot.*

All About Flooring.

Solutions for OR, ICU, NICU and Specialized Services

FLOORING CREATED FOR YOUR MOST DEMANDING HEALTHCARE ENVIRONMENTS.

In specialized hospital areas, your healthcare challenges are varied and complex, with much at stake. These environments must support patient health and safety—for patients with significantly compromised health, including reduced immune system and respiratory capacity, and who may be particularly vulnerable due to their age.

our flooring solutions offer specialized advantages to meet all these healthcare needs. our rubber floors are resistant to the kind of stains, disinfectants and chemicals most often encountered in specialized hospital areas, including betadine, and our flooring can be cleaned without resorting to strong, caustic chemicals.

You'll also find that our flooring's static dissipative properties are ideal for areas where imaging and diagnostic equipment is used—meeting strict regulatory and medical requirements.

With nora flooring solutions, everyone—surgeons, nurses and technicians—will enjoy fatigue-reducing comfort underfoot.

*Durable, functional and reliable,
our flooring solutions meet the
highest requirements for staff
ergonomics, patient safety and
overall hygienic qualities.*

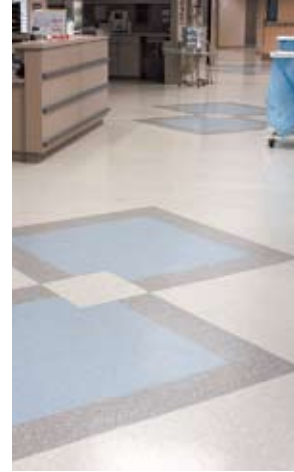

All About Flooring.

Emergency Departments

HIGH-PERFORMANCE SOLUTIONS FOR HIGH-RISK HEALTHCARE ENVIRONMENTS.

The properties of rubber flooring are ideally suited to meet the health and safety needs of emergency department staff and patients at risk in your most critical healthcare areas. You get the durability to stand up under the loads of heavy diagnostic equipment, gurneys and more. The proven clinical advantages of high indoor air quality in protecting high-risk patients. And the slip and stain resistance to help ensure safety. We even offer special low-contrast colors to help clinicians spot dropped instruments.

Our flooring is bacteriostatic and resistant to fungi and micro-organisms. High indoor air quality protects fragile immune and respiratory systems. There's also less need to introduce powerful cleaning chemicals to your intensive care environments—so you can use safer and greener cleaning methods.

Imaging staff will appreciate excellent comfort and acoustics that contribute to maximum efficiency and a quieter ambience.

All About Flooring.

Imaging and Specialized Care

UNIQUE FLOORING SOLUTIONS TO SUPPORT YOUR UNIQUE HEALTHCARE NEEDS.

Imaging Areas: There's a solution for all your health and safety challenges related to diagnostic medicine and imaging—including MRI, CT scanning, X-ray and more. Our flooring can meet your challenges by giving you excellent static dissipation to help ensure precise results, bacteriostatic and fungistatic properties to protect against infection, and high rolling load resistance for smooth transfer of heavy equipment, carts and patient beds. You'll also find that nora rubber flooring helps you maintain a hygienic environment that reduces both maintenance requirements and the need for powerful chemicals.

Imaging staff will appreciate excellent comfort and acoustics that contribute to maximum efficiency and a quieter ambience.

Specialized Care Facilities: For specialized care applications like urgent care facilities, medical office buildings and pharmacy areas, nora flooring solutions offer the performance to meet unique challenges—such as the potential threat of micro-organisms in extremely high-traffic environments. Our flooring solutions resist stains, impact, fungi and bacteria, and provide excellent slip resistance plus good acoustic qualities. That helps you provide a safe, healthy and comfortable environment for patients and healthcare providers, and reduces maintenance costs by avoiding the need for coating, waxing, stripping or rewaxing.
